

SOLVING WORD PROBLEMS WITH CARS

There is **1** red car.

There is **1** blue car.

There are **2** orange cars.

How many cars are there in all?

$$\underline{1} + \underline{1} + \underline{2} = \underline{4} \text{ cars}$$

Read and solve each word problem.

1. There is **1** purple car.

There are **6** yellow cars.

There are **2** green cars.

How many cars are there altogether?

$$\underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad} \text{ cars}$$

2. There are **3** yellow cars.

There are **3** red cars.

There is **1** blue car.

What is the total number of cars?

$$\underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad} \text{ cars}$$

3. There are **3** orange cars.

There are **5** green cars.

There are **4** purple cars.

How many cars are there altogether?

$$\underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad} \text{ cars}$$
